

Involvement in Demonstration Demonstration

Date	6 July 2026
Team ID	XXXXXX
Project Name	Rising Waters: A Machine Learning Approach to Flood Prediction
Maximum Marks	1 Mark

Involvement in Demonstration: Demonstration:

The project demonstration was conducted collaboratively, with every team member actively participating in presenting different aspects of the Flood Prediction using Machine Learning system. Responsibilities were distributed according to individual contributions made during the project development phase. Each member explained their assigned module, demonstrated its functionality, and addressed questions related to their area of work. This collaborative approach ensured a smooth, well-organized, and comprehensive project presentation.

S.No	Team Member Name	Role in Demo	Section Presented	Contribution Summary	Participation (Active / Passive)
1	D.Prasanna	Team Leader	Introduction & Project Overview	Introduced the problem statement, project objectives, and coordinated the overall demonstration.	Active
2	Chokka.Abitha	Data Processing Lead	Dataset Preparation & Machine Learning Model	Explained dataset collection, preprocessing, feature engineering, model selection, and training process.	Active
3	B.Navya	Application Developer	Flask Web Application Demonstration	Demonstrated the web interface, user input process,	Active

				prediction execution, and result display.	
4	B.Varshitha	Testing & Evaluation Lead	Model Performance & Testing	Presented testing procedures, evaluation metrics, confusion matrix, and prediction accuracy.	Active
5	M.Harika	Documentation Coordinator	Documentation & Future Enhancements	Explained project documentation, scalability plans, limitations, and future development roadmap.	Active

Coordination Notes: Notes:

Aspect	Details
Team Leader / Coordinator	D.Prasanna
Overall Team Coordination Rating (1-5)	5/5
Any issues during demo	No major technical or operational issues were encountered during the demonstration. All modules functioned as expected.
How issues were resolved	Minor input validation queries were addressed immediately by explaining the workflow and re-running the prediction process successfully. Effective communication and prior practice ensured a smooth demonstration.
