

Proposed Solution

Filled project document for GitHub and SkillWallet submission

Date	28 June 2026	Team ID	To be updated in SkillWallet
Project Name	Rising Waters: A Machine Learning Approach to Flood Prediction	Team Members	Devireddy Prasanna, Chokka Abitha, Navya Borugadda, Bodi Varshitha, Mulakala Harika Venkata Sridevi

Parameter	Description
Problem Statement	Lack of timely, accurate early flood warning leaves authorities with insufficient response time.
Idea / Solution	Build a machine learning-powered flood prediction system and integrate the best model into a Flask web app.
Novelty / Uniqueness	Compares multiple algorithms and packages the best model in an accessible interface for practical use.
Social Impact	Supports evacuation planning, disaster response, and reduced loss of life and property.
Business / Adoption Model	Can be adopted by local authorities, academic demonstrators, or disaster management teams as a decision-support tool.
Scalability	Can be deployed on IBM Cloud and extended to more regions, APIs, and real-time weather feeds.
