

Customer Journey Map

Filled project document for GitHub and SkillWallet submission

Date	28 June 2026	Team ID	To be updated in SkillWallet
Project Name	Rising Waters: A Machine Learning Approach to Flood Prediction	Team Members	Devireddy Prasanna, Chokka Abitha, Navya Borugadda, Bodi Varshitha, Mulakala Harika Venkata Sridevi

Stage	User Action	Touchpoint	Need	Emotion	System Response
Awareness	Learns that heavy rainfall may cause flooding.	Weather data and district reports	Understand risk quickly.	Alert	Application provides a focused prediction workflow.
Entry	Opens the Flask dashboard.	Web browser	Simple access.	Hopeful	Dashboard loads input form and project context.
Input	Enters rainfall and visibility values.	Weather parameter form	No confusion in fields.	Careful	Form validates values before prediction.
Prediction	Submits readings.	ML model service	Fast result.	Urgent	Model returns Flood or No Flood classification.
Action	Shares warning or resource plan.	Result screen/report	Decision support.	Responsible	Result supports evacuation and deployment planning.
Review	Checks historical predictions and accuracy.	Notebook/report	Evidence of reliability.	Confident	Model metrics and reports support validation.
